

Thank you for participating in REWIND. Because of your efforts today, you have prevented dangerous materials from going into landfills, and have ensured that your old electronics will be recycled in a safe and secure way.

This year we are not able to accept CRT TVs or CRT computer monitors. (Those are the ones that are really thick from front to back.) They are particularly complex to recycle (in part because the glass screens contain lead). Very few places are equipped to fully recycle them, and there are no longer any within feasible shipping distance. Due to their weight, shipping costs to the few remaining recyclers are prohibitive. We will be watching this situation to determine whether we may be able to accept them again in the future. In the meantime, if you can't wait, we've been advised that the Billings landfill will accept them at no charge for Carbon County residents.

We welcome back Yellowstone E-Waste Solutions to this year's event. They are located in Billings, and they were our recyclers for the very first REWIND. This event is made possible by them, our volunteers, plus donations and support from our sponsors and the community.

Donations are appreciated, and will go toward financing the next Red Lodge electronic recycling event. If you like, you may support REWIND by leaving a donation today, or you may designate REWIND as a recipient for your Fun Run contribution. For your non-electronic recycling needs, we encourage your support of Red Lodge Recycling.
